PROFESSIONAL SUMMARY

Full Stack Software Engineer with **5 years of experience** building scalable web applications and AI-powered products across the entire development lifecycle. Proven ownership of LLM-based platforms: Vue 2 to Vue 3 migrations, MongoDB to Elasticsearch data re-architecture (80% performance gain), Python LLM backends, conversational dashboards, and role-based admin tooling. Strong in Vue.js, React, Node.js, Python, Elasticsearch, MongoDB, PostgreSQL, cloud and DevOps, with hands-on use of AI coding agents and MCP servers to deliver faster without compromising code quality.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Go, Java, HTML5, CSS3, SCSS

Frontend: Vue.js (Vue 2, Vue 3, Composition API), React.js, Vuex, Redux, Vuetify, Bootstrap, ECharts, Highcharts, AG Charts, AG Grid

Backend: Node.js, Express, Nest.js, FastAPI, Flask, Go Fiber, RESTful APIs, API Gateway, Role-Based Access Control (RBAC)

Databases & Search: Elasticsearch, MongoDB, PostgreSQL, Kibana

AI & LLM: LLM API Integration, AI Chatbots, ChatKit, Prompt Engineering, Cursor AI, Claude Code, Aider, GitHub Copilot, ChatGPT, Claude, Gemini, MCP Servers (Figma, GitHub, Sonar, Stitch)

Cloud & DevOps: AWS (EC2, S3), GCP, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Git, SonarQube, Jira

Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, System Design, Code Review, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Product Developer II Nov 2022 – Present

XLSCOUT, Chandigarh

TechScaperLLM and DraftingLLM (Full Stack, Complete Ownership)

- Took complete ownership of the TechScaperLLM and DraftingLLM products, delivering features end to end across frontend, backend, and data layers.
- Migrated both applications from Vue 2 to Vue 3 using the Composition API, improving performance and code maintainability.
- Re-architected the TechScaperLLM backend by migrating data from MongoDB to Elasticsearch, improving performance by 80%.
- Built Python backend services integrating LLM APIs to power chatbots that let users ask questions, filter data, and interact with their dashboards in natural language.
- Developed an interactive React application with ChatKit integration that handles continuous LLM invocations and updates the UI in real time.
- Built interactive charts and dashboards with ECharts, Highcharts, AG Charts, and AG Grid to visualize complex datasets.
- Maintained code quality using SonarQube and Sonar MCP, enforcing quality gates on every migration and release.

Admin Panel for R&D Team

- Built an admin panel from scratch (frontend and backend), enabling the R&D team to manage multi-level user access and track logs and failures.
- Implemented API gateways with role-based authorization so that only admins can access sensitive admin APIs.

Patent Search Engine

- Led development of a patent search engine using Vue.js, Node.js, Elasticsearch, MongoDB, and PostgreSQL with optimized APIs and query performance.
- Managed an Elasticsearch index of 156 million documents (21 TB) with complex queries and aggregations.
- Migrated the application from Vue 2 to Vue 3, improving performance and code organization through the Composition API.

YouTube Caption Search Module and Patent Data Management Tool

- Built a YouTube caption search module with Vue.js, Nest.js, and Elasticsearch to meet tight delivery deadlines.
- Developed a Go (Go Fiber) tool to export patent data from Elasticsearch to Excel and retrieve XML data from PostgreSQL, with GCP integration.

AI-Assisted Engineering

- Accelerated development by 50%+ using AI agents (Cursor AI, Claude Code, Aider) and MCP servers (Figma, GitHub, Sonar) for rapid prototyping, code generation, and Figma-to-code workflows.

Contract Senior Software Developer Feb 2025 – Mar 2025

myySports, *Remote*

- Maintained and extended the Node.js backend, using AI-powered tools (Claude Code, Cursor AI) to accelerate delivery.
- Implemented user retention features, including soft and hard delete with a 30-day grace period.
- Created a user broadcast message service delivering scores and statistics through in-app push notifications.
- Developed a login reward feature for new users to increase engagement, generating UI components with AI-assisted development.

Assistant System Engineer Oct 2021 – Nov 2022

Tata Consultancy Services (TCS), *Bangalore*

- Designed and implemented the interface of a client-facing application using React.js, delivering an intuitive user experience.
- Engineered RESTful APIs in Node.js that automated client reimbursement processes, improving efficiency and user satisfaction.
- Handled Help Desk work requests within defined response times while maintaining a customer satisfaction rating above 90%.

PROJECTS

Calendar and Events | Vue.js, Node.js, Express, MongoDB

- Built a full-stack event management web app with MVC architecture, letting users create events, set reminders, collaborate, and manage participation.
- Implemented secure OTP-based registration with Nodemailer for email verification.

Easy-do Server | Node.js, Express, MongoDB

- Developed a Jira-like project management tool with a ticketing system to track tasks, issues, and bugs and assign them across team members.
- Built project creation, admin role assignment, and team management features.

EDUCATION

B.Tech, Computer Science Aug 2017 – Aug 2021

Jawaharlal Nehru Technological University, *Hyderabad*
